# Designing Human-Centred Technology: A Cross-Disciplinary Project in Computer-Aided Manufacturing

Filesize: 2.65 MB

Reviews

The ideal pdf i at any time go through. It is really basic but unexpected situations from the fifty percent of your pdf. Its been designed in an extremely easy way and is particularly only after i finished reading this pdf through which really changed me, alter the way i really believe.
(Prof. Kendrick Stracke)

DESIGNING HUMAN-CENTRED TECHNOLOGY: A CROSS-DISCIPLINARY PROJECT IN COMPUTER-AIDED MANUFACTURING

To get **Designing Human-Centred Technology: A Cross-Disciplinary Project in Computer-Aided Manufacturing** PDF, please follow the hyperlink below and save the ebook or have access to additional information that are have conjunction with DESIGNING HUMAN-CENTRED TECHNOLOGY: A CROSS-DISCIPLINARY PROJECT IN COMPUTER-AIDED MANUFACTURING ebook.

Springer. Paperback. Book Condition: New. Perfect Paperback. 208 pages. Dimensions: 9.6in. x 6.7in. x 0.5in.This second book in our series Artificial Intelligence and Society explores the issues involved in the design and application of human-centred systems in the manufacturing area. At first glance it may appear that a book on this topic is somewhat peripheral to the main concerns of the series. In fact, although starting from an engineering perspective, the book addresses some of the pivotal issues confronting those who apply new technology in general and artificial intelligence (AI) systems in particular. Above all, the book invites us to consider whether the present applications of technology are such as to make the best use of human skill and ingenuity and at the same time provide for realistic and economically sustainable systems design solutions. To do so it is necessary to provide systems which support the skill, and are amenable to the cultures, of the areas of application in question. In a philosophical sense it means providing tools to support skills rather than machines which replace them, to use Heideggers distinction. The book gives an authoritative account of the University of Manchester Institute of Science and Technology (UMIST) tradition of human-centredness and provides a participatory design ap proach which focuses on collaborative learning and enhancement and creation of new skills. It also argues that collaboration should be supported by institutions through the creation of supportive infrastructures and research environments. It emphasises the optimisation of practical knowledge with the help of scientific knowledge and rejects the alternative. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Perfect Paperback.
